

Cancelling machine **Hole punching machine**

Cancelling, validation machines and perforating machines are tools to mark, cancel or validate important documents, forms, tenders, cheque cards, passports, labels and many other articles permanently.

Cancelling and validation machines are able to punch stacks of paper with a single punch symbol. The capacity of these machines may reach a maximum of 200 sheets. This machine is often used to validate tenders to prevent manipulation. But also banks, insurance companies and forwarding agents use this machines for various purposes. Also very popular is this machine in the administration of cities or municipal administration. Both, manual and electric cancelling machines are available for your choice.

Cancelling machine PERFOSET I/L

Our cancelling machine Perfoset I/L is the smaller manual validation machine. With this machine, paper stacks up to 50 sheets (approx. 5 mm height) can be validated in one operation.

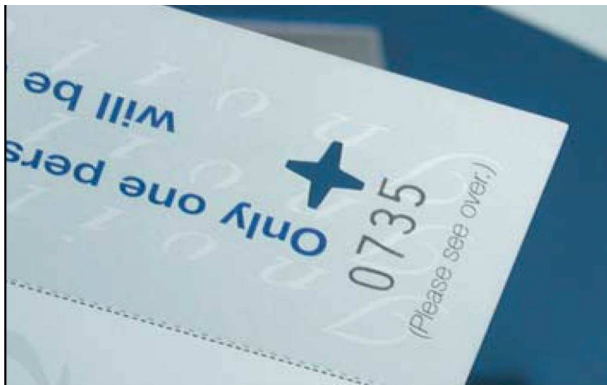

The standard hole diameter is 8 mm, this machine comes with one fixed symbol. Due to the smaller size, a maximum insertion depth of 75 mm can be reached. With two adjustable gauges, a perfect and exact positioning of the paper stack is possible. To avoid unauthorized use, this machine can be supplied with a security lock.

Technical data:

- Standard hole diameter: 8 mm
- Capacity: 50 sheets
- Insertion depth: 75 mm
- Weight: 5.8 kg
- Packaging dimensions: 43 x 34 x 20 cm

Options PERFOSET I/L

- Security lock
- Notching press with a fixed read
- Differing symbol diameters
- Special symbols

Cancelling machine PERFOSET II/L

The validation machine Perfoset II/L is the more powerful manual cancelling machine. Due to the higher capacity, this is mostly the choice of the users when manual validation is required.

This cancelling machine comes with an insertion depth of 110 mm and a capacity of a maximum of 80-100 sheets. The standard hole diameter is 12 mm, you can chose between 12 different symbols and the standard round hole.

For exact and precise positioning, this machine includes two variable gauges. This facilitates the positioning of paper stacks with more than 100 sheets of paper. To avoid unauthorized use, this machines can also be supplied with an extra safety lock.

Technical data:

- Standard hole diameter: 8 or 12 mm
- Capacity: 80-100 sheets
- Insertion depth: 110 mm
- Weight: 11.2 kg
- Packaging dimensions: 52 x 33 x 23 cm

Options PERFOSET II/L

- Security lock
- Notching press with a fixed read
- Differing symbol diameters
- Special symbols

Cancelling machine PERFOSET II/LA

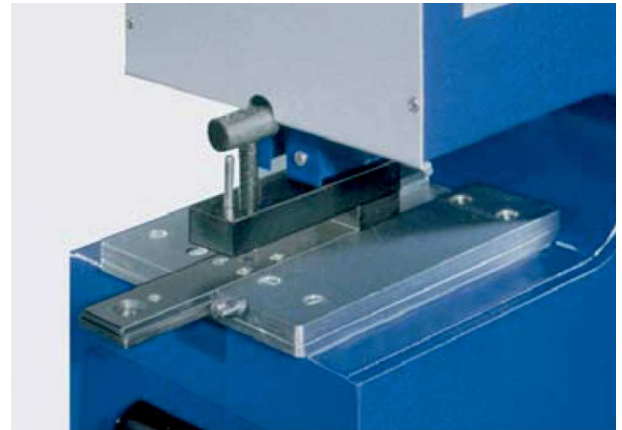

Our validation machine Perfoset II/LA is a very versatile cancelling machine. This machine comes with one exchangeable symbol, the symbol itself is on a punching die unit which can be exchanged easily and fast one against each other. The standard diameter of the punch is 8 mm. This cancelling machine has a capacity of 100 sheets of paper which corresponds to a paper stack of approx. 10 mm.

Due to the punching die unit, the maximum insertion depth is reduced to a maximum of 50 mm, a rear gauge is also not available as the punching die is one integral part. However, a side gauge is still available to facilitate the position of the validation.

For exact and precise positioning, this machine includes two variable gauges. This facilitates the positioning of paper stacks with more than 100 sheets of paper. To avoid unauthorized use, this machines can also be supplied with an extra safety lock.

Technical data:

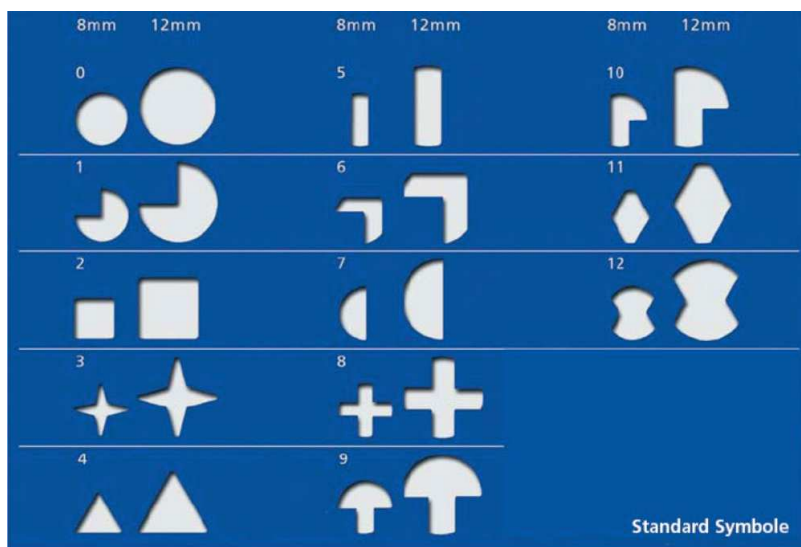

- Standard hole diameter: 8 mm
- Capacity: 80-100 sheets
- Insertion depth: 50 mm
- Weight: 11.2 kg
- Packaging dimensions: 52 x 33 x 23 cm

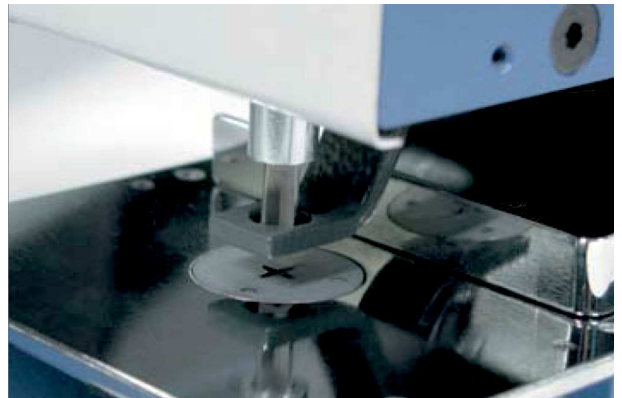

Options PERFOSET II/LA

- Security lock
- Notching press with a fixed read
- Differing symbol diameters
- Special symbols
- Punch die unit with extra symbol
- Side gauge

Hole punching machine

Cancelling machine Office L

The validation machine Office L is a small but powerful electric punching machine.

The punching is released by a lateral push-button, up to 50 sheets of paper can be validated in one single operation. The maximum insertion depth is limited to 50 mm due to the exchangeable punch symbol. These punching dies can be exchanged quick and easy, you can chose between twelve different symbols and a round hole. The standard diameter is 8 mm.

Upon request, these cancelling machine can be equipped with a safety lock and a foot switch.

Technical data:

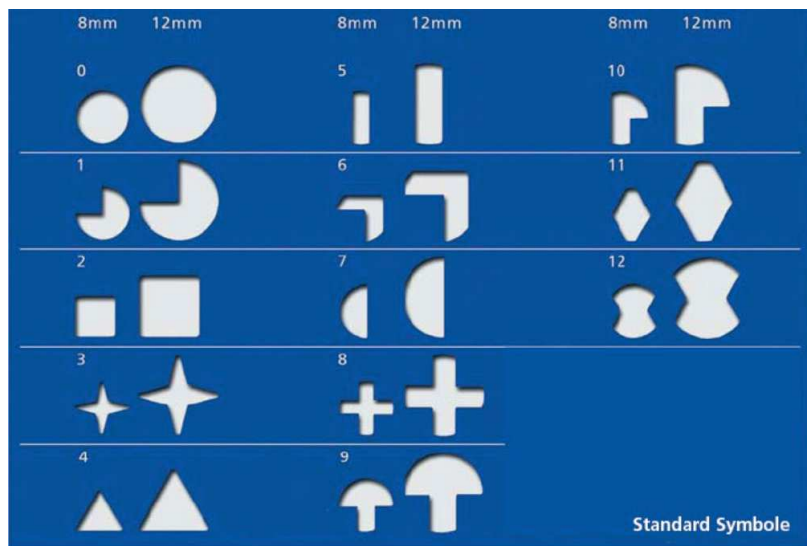

- Standard hole diameter: 8 mm
- Capacity: 50 sheets
- Insertion depth: 50 mm
- Weight: 18 kg
- Packaging dimensions: 54 x 39 x 33 cm
- Motor: 230 V – 50 cps

Options Office L

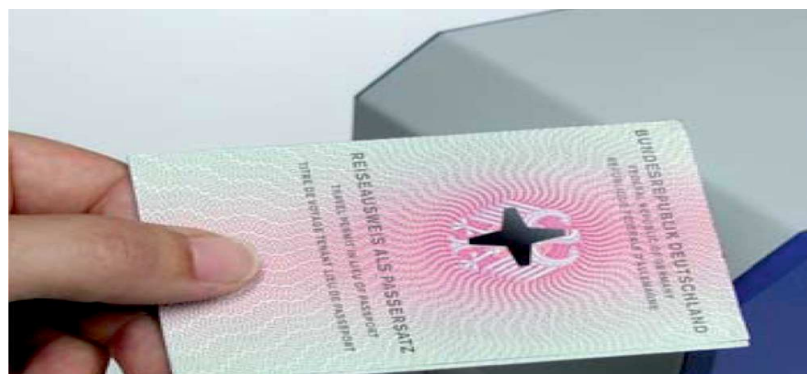

- Security lock
- Differing symbol diameters
- Special symbols
- Side gauge
- Foot switch

Cancelling machine PERFOSET E/L

The electric cancelling machine Perfoset E/L offers you professional power to a reasonable price. With the Perfoset E/L, you will be able to validate paper stacks up to 100 sheets of paper in one operation without any physical power. Therefore, this punching machine is developed for highest demands and applications, where big quantities of documents have to be handled and marked.

The Perfoset E/L is a very robust hole punching machine which is supplied with a modern NC motor. The standard symbol diameter is 8 or 12 mm, you can chose between 13 different symbols (12 symbols, 1 round hole). Special punch symbols can be manufactured to your requirements.

This machine comes together with one rear and one side gauge to facilitate the positioning of the documents. The maximum insertion depth is 105 mm. Upon request, these cancelling machine can be equipped with a safety lock and a foot switch.

Technical data:

- Standard hole diameter: 8 or 12 mm
- Capacity: 100 sheets
- Insertion depth: 105 mm
- Weight: 26 kg
- Packaging dimensions: 59 x 39 x 27 cm
- Motor: AC 230 V

Cancelling machine PERFOSET E/LA

The Perfoset E/LA is a versatile electric cancelling machine with interchangeable punch dies, where the user can easily change the punch symbol. The standard machine comes with one punch symbol of your choice with a diameter of 8 mm.

Our punching machine Perfoset E/LA can mark up to 100 sheets in one operation, the insertion depth is restricted to 50 mm due to the interchangeable punch dies. Besides, there is no rear gauge available.

The machine comes with a modern and powerful NC motor and is suitable in every office, where big quantities have to be validated. The punching process is released by pressing the push button on the side of the machine, a foot switch is available on demand. A safety lock is also available on request.

Technical data:

- Standard hole diameter: 8 mm
- Capacity: 100 sheets
- Insertion depth: 50 mm
- Weight: 26 kg
- Packaging dimensions: 59 x 39 x 27 cm
- Motor: AC 230 V

Cancelling machine PERFOSET ES/L

Our electric cancelling machine Perfoset ES/L is the high performance electric punching machine in our range. It is supplied with an especially powerful gear and thus suitable for continuous operation. This machine comes together with a metal-stand and a foot switch. The cancelling machine is recommended to be fixed on this metal-stand.

The Perfoset ES/L can mark simultaneously up to 3 symbols in one operation with a diameter of 8 or 12 mm. You can choose between 13 different punch symbols (12 symbols, 1 round hole). To facilitate the position of the symbol, two adjustable gauges are also in the standard package included.

The insertion depth of this machine reaches 105 mm, paper stacks with 100 sheets can be marked easily.

A large quantity of additional equipment is also available for this machine.

Technical data:

- Standard hole diameter: 8 or 12 mm
- Capacity: 100 sheets
- Insertion depth: 105 mm
- Weight: 90 kg
- Packaging dimensions: 210 x 49 x 92 cm
- Motor: AC 230 V
- Weight: 90 kg
- Packaging dimensions: 210 x 49 x 92 cm
- Motor: AC 230 V

Cancelling machine PERFOSET EX/L

This electric hole punching machine is the most powerful cancelling machine in our range offering the highest capacity to validate in one operation. With our Perfoset EX/L, you will be able to mark up to 200 sheets of paper within 2 seconds. This cancelling machine is especially designed for forgery-proof marking or cancelling of tender documents, submissions, etc., where paper stacks of up to 20 mm must be validated.

This machine is equipped with one punch symbol with 8 mm diameter. You can chose between 13 different symbols (12 symbols, 1 round hole). For exact positioning, this machine comes with two adjustable gauges, the insertion depth is limited to 62 mm.

Our cancelling machine Perfoset EX/L is supplied with a safety lock as standard equipment to prevent unauthorized persons from using this machine. Additional equipment is also available on request.

Technical data:

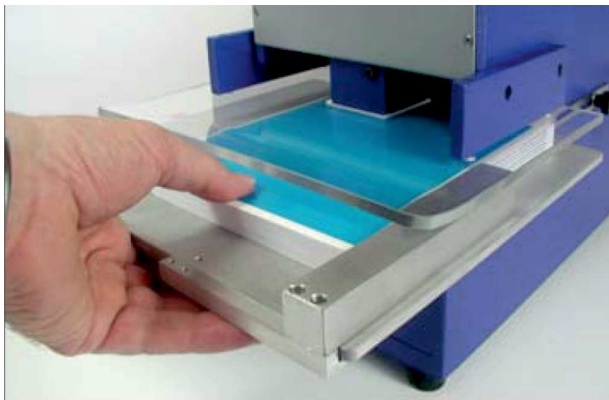

- Standard hole diameter: 8 mm
- Capacity: 200 sheets
- Insertion depth: 62 mm
- Weight: 26 kg
- Packaging dimensions: 60 x 40 x 50 cm
- Motor: AC 230 V
